Holding handles. With knees locked, raise up on toes as high as possible and return until heels touch floor. Can do on step.

In a seated position, chair, place a 22 cm ball between the thighs and squeeze together. Hold for 4 seconds and release.

Back to Life Chiropractic • Band Exercise

Start off gradually. Use a resistance that causes your muscles to fatigue at the end of the set. Perform 3 or 4 times a week. Follow the directions in each section. Start off with a comfortable # of sets/repetitions and then build up from there. Exhale when performing the strenuous phase of each motion and inhale while returning to the starting position. Protect your back from strain by tightening abdominal muscles and keeping back straight. Perform all movements smoothly, never jerk or bounce from one position to another.
